INFORMATION DISCLOSURE STATEMENT

Under 37 CFR §1.97

This Information Disclosure Statement is filed with patent application, so it is timely filed without payment of a fee. 37 CFR §1.97(b).

The filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made (37 CFR §1.56(g)), an admission that the information cited is, or is considered to be, material to patentability or that no other material information exists.

The filing of this Information Disclosure Statement shall not be construed as an admission against interest in any manner. Notice of January 9, 1992, 1135 O.G. 13, at 25.

This Information Disclosure Statement is made to comply with the duty of candor imposed on all individuals associated with the filing or prosecution of this application, as defined by 37 CFR §1.56(c).

Twenty-three (23) U.S. patents and twenty-two (22) foreign patent documents are listed on the attached three (3) sheets of Form PTO/SB/08A, which are made a part hereof. A copy of each reference is enclosed.

Also made a part hereof, although not recited on the Form PTO/SB/08A, is a copy of a search report dated 24 September 2001 by the German Patent Office on

German application 100 60 443.9, upon which this application claims priority.

References AA, AG through AS, AU through AW, BA through BF, BH through BO and BQ through BV are cited in the German search report. To the extent possible, the undersigned has sought out English language equivalents for foreign documents which are not in English. As to that end, the undersigned attorney reports that Reference AB is an English language family member of Reference BV, Reference AC is an English language family member of Reference BO, Reference AD is an English language family member of Reference BQ, Reference AE is an English language family member of Reference BR and Reference AF is an English language family member of Reference BS.

The undersigned attorney notes that References BH and BT are not prior art against the present application, for the reason that each was published after the German filing date relied upon. Of these references, the undersigned attorney further notes that Reference BH is a PCT publication of a case of US origin (Ser. No. 09/439,692) and it could become prior art in the United States if it issues as a United States patent. It does not appear that there is any US equivalent of Reference BT. These references are reported because they appeared in the German search report.

The foregoing Information Disclosure Statement is based upon the information known to the inventor or contained in the undersigned attorney's file as of the filing date of this statement and is inclusive of the best information known to the undersigned at that date. Prompt consideration of the Information Disclosure Statement and the references by the Examiner is earnestly requested.

Respectfully submitted,

Stephen L. Grant
